Summary

- IT Analyst with 6 years of experience, specializing in network management, system administration, and troubleshooting.
- Proven ability to support complex IT environments, with expertise in RHEL, Linux, and Windows Server systems.
- Skilled in managing critical infrastructure services such as DNS, DHCP, and Active Directory.
- Proficient in network administration with hands-on experience using Mikrotik, Fortigate, Ubiquiti, and Cisco infrastructures.
- Experienced in IT support, providing helpdesk services, and troubleshooting.

Education

- **University Estácio de Sá | Manaus, BR | Computer Networking | 09/2023**
Comprehensive training in computer networking, covering network infrastructure design, routing and switching, server administration (Linux and Windows), network security (firewalls, VPNs, IDS/IPS), virtualization, and cloud services. Hands-on experience with tools like Wireshark, Packet Tracer, and GNS3. Knowledge of structured cabling, subnetting, TCP/IP protocols.

Technical Skills

- Networking (TCP/IP, VLAN, Routing, Switching)
- Cybersecurity (Firewalls, Endpoint Protection, Application Security)
- Operating Systems (Windows, Linux)
- Virtualization & Infrastructure
- Troubleshooting & Support
- Active Directory, Group Policy, Server Management
- Structured Network Cabling

Experience

Home Lab | Morden, MB | System Administrator | 12/2022 – Present

- Home IT Infrastructure
- Managed pfSense Firewall, firewall rules, NAT, VPNs, VLAN segmentation, and Multi-WAN.
- Optimized UniFi networks, configured VLANs, guest networks, QoS, and link aggregation.
- Managed Proxmox Virtualization, including VMs, LXC containers, network interfaces, backup strategies, and high availability.
- NAS ZFS storage pools, RAID, network shares NFS, SMB, iSCSI, and implemented off-site backup solutions.

Cal-Comp Institute for Research and Innovation, Amazon Technology ICCT | Manaus, BR IT Support Technician II | 10/2022 – 09/2024

- Managed Linux (Debian, Ubuntu, RHEL) and Windows (AD, DHCP, DNS, File Server) environments, along with storage solutions (TrueNAS) and open-source tools Zabbix, GLPI, Passbolt.
- Configured and managed network infrastructure using Cisco switches, access points, and VLANs.
- Managed UniFi access points, optimized Wi-Fi performance, and configured guest networks with isolation.
- Provided user support, hardware/software setup, printer/computer maintenance, and structured network cabling.

RB Diagnostics Laboratory | Manaus, BR IT Analyst II | 09/2021 – 10/2022

- Managed Fortigate firewall rules, network infrastructure, and domain controllers.
- Maintained Windows & Linux servers, including open-source tool management.
- Provided Helpdesk N1/N2 support and structured cabling, along with managing surveillance systems.
- Integrated and managed laboratory equipment results for efficient operations.

RB Diagnostics Laboratory | Manaus, BR IT Helpdesk | 05/2020 – 10/2021

- Provided technical support for computers, printers, labelers, and handled structured network cabling.

Infolinn Information Technology Solutions – Freelance | IT Helpdesk | 01/2018 – 12/2018

- Performed maintenance of hardware, operating systems, software, IT infrastructure, and structured network cabling.
